

“The thing that we liked most about working with Bruckner’s was the personalized attention and responsiveness to our needs.”

Greg Devoll, President YDA Transport

Based in Fort Worth, Texas, YDA Transport is a company aimed at providing outstanding value in attaining fresh water and managing produced and flowback water disposal needs. They are able to accomplish this by keeping two goals at the forefront of everything they do:

- Provide solid customer service ensuring you never have to be concerned with securing fresh water or disposing of waste water generated by your production operations.
- Keep costs low to maximize your production return and help maintain profitability for marginal wells that might otherwise be shut-in due to high lease operating expenses (LOEs).

YDA Transport currently leases two Mack trucks from Bruckner Leasing Company. Fort Worth Leasing Manager, Jon Hunt, recently had the opportunity to discuss a few of the reasons that YDA Transport President, Greg Devoll was originally interested in the Full Service Leasing option. When we asked Greg what he found as a result of becoming a leasing customer at Bruckner’s, he replied that “with no down payment, I was able to free up my working capital”. Greg also mentioned that the “leasing program has allowed me to better predict my overall maintenance costs, which has taken a load off of my mind”.

We, at Bruckner Leasing, are proud to be teamed up with YDA Transport and look forward to many years of continued success in this growing relationship.

For more information on how Bruckner Leasing can help you overcome these obstacles and more, please contact one of our leasing representatives today.
