YOUR UPTIME IS OUR PRIORITY

Bruckner's of Yakima, Ellensburg, and Wenatchee, WA, join the growing list of Uptime Certified locations, bringing the total to 31 Uptime Certified locations across the dealer network. As your Mack and Volvo Certified Uptime Center, we're dedicated to saving you time. We've made changes that increase uptime for your trucks, including a more efficient check-in and assessment, a designated Uptime Bay for quick repairs, and direct communication throughout the repair process. These advantages mean that your trucks spend less time in the shop and more time on the road. Which means a better bottom line for you.

BRUCKNER'S MANAGED SERVICE PLANS

Safeguarding
Your Investment.
Maximizing
Your Uptime.

Trained
Technicians

Genuine Parts

State-of-the-art
Facilities

Fleet
Management

For decades, Bruckner Truck & Equipment has built its reputation on delivering exemplary service to customers across every segment of the trucking industry. As one of the largest Volvo and Mack dealers in the country, we pride ourselves on staying at the forefront of innovative products and services that keep our customers ahead of the curve.

Through our partnership with Volvo and Mack, Bruckner's customizable Managed Service Plans provide peace of mind, predictable costs, and proactive maintenance strategies designed to maximize uptime while controlling rising maintenance expenses.

MOVING BEYOND "FIX AS FAIL"

In today's freight market, rapid and timely deliveries are not optional — they are expected. That demand takes a toll on even the newest trucks. Waiting for parts to fail before replacing them can lead to costly breakdowns, missed loads, and unnecessary downtime.

Bruckner's is helping customers shift from a "fix as fail" mindset to a proactive maintenance strategy. Replacing common wear items such as belts and tensioners before they fail helps prevent unexpected roadside events and keeps trucks where they belong — on the road.

LOCKED-IN PRICING. LONG-TERM PROTECTION.

Our Managed Care Program allows customers to lock in parts and labor pricing for all required maintenance items for up to seven years or 750,000 miles. Every plan is tailor-made to fit the specific application of the truck, whether it operates in:

- Oilfield environments
- Over-the-road freight
- Refuse or severe-duty applications

Protect your valuable investment with certified technicians performing service using genuine parts and high quality lubricants for maximum reliability and performance.

Let us take care of your trucks so you can focus on your business. We proactively monitor your truck's performance and schedule maintenance at a time that works best for you.

Over 400 locations ready to service your trucks anytime, anywhere to keep your trucks on the road.

“Advantages that we have experienced with the plan are cost savings and strong communication.”

Andrew Luig, Operations Manager
First Choice Transportation

We ensure the correct duty category is assigned to your program — from economy light 90,000-mile service intervals to severe duty plus 600-engine-hour oil drains.

With Volvo and Mack's Adaptive Maintenance system, real-time fuel economy and idle data are monitored to predict when service is truly needed — rather than relying on static drain intervals. This means:

- No over-maintaining (which can increase service costs by up to 35%)
- No under-maintaining
- Maximum operational efficiency
- Reduced unplanned downtime

DEDICATED FLEET SUPPORT – WE HANDLE THE DETAILS

Bruckner's doesn't leave you to track maintenance alone. We've invested in dedicated Fleet Managers who monitor each truck enrolled in the program. They coordinate scheduling, work around your operational needs, and ensure a seamless service handoff when your truck arrives at one of our locations.

Each service visit includes:

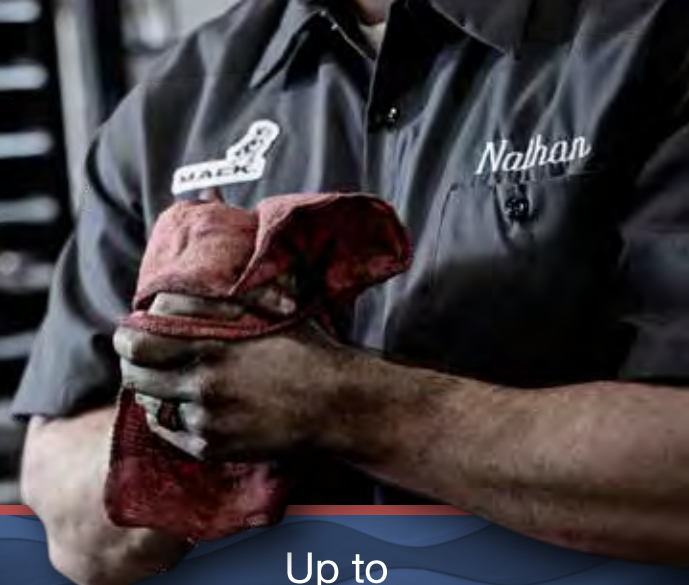

- Volvo- or Mack-certified technicians
- Genuine OEM parts
- Premium lubricants
- Rigorous multi-point inspections
- Maintenance performed according to manufacturer recommendations

FIRST CHOICE
TRANSPORT

REAL RESULTS
FROM THE ROAD

First Choice Transportation, a long-standing participant in Bruckner's Managed Care Program, has logged more than 3.1 million miles on units serviced and tracked by Bruckner's. Andrew Luig, Operations Manager for First Choice Transportation, shares his experience, "We opted to add the managed care program to our Volvo fleet because we wanted peace of mind and help scheduling maintenance needs on our new trucks. Some advantages that we have experienced are some cost savings and strong communication with the plan. I'd also add and say that the pricing is in line with national rates, in most cases. As far as average turnaround time for our PM service, they have been pretty efficient as long as we hit the scheduled appointment days and times."

Control your maintenance costs with a **fixed monthly payment**

Save up to
4 DAYS
of planned downtime

Up to
38%
improved uptime

This approach not only protects your warranty but helps identify potential issues before they impact performance.

With access to over 430 Volvo locations and 400+ Mack locations nationwide, customers benefit from expanded service coverage wherever the road takes them.

BENEFITS FOR FLEETS — AND OWNER-OPERATORS

While many large fleets benefit from the fixed pricing and centralized fleet management support, owner-operators also see tremendous value.

KEY ADVANTAGES INCLUDE:

- No credit check required
- Fixed monthly payments
- No interest financing directly through Volvo
- Reduced month-to-month maintenance fluctuations
- Improved uptime
- Potential for higher residual value (up to 5%)
- Up to 22% reduction in unplanned downtime with up-to-date software

By converting variable maintenance expenses into predictable monthly payments, customers gain stronger budgeting control and eliminate surprises.

Focus on Your Business — We'll Handle the Maintenance
Managing your own maintenance comes with hidden costs:

- Technician labor
- Parts and disposal expenses
- Facility costs and property taxes
- Fleet management time
- Unplanned downtime

With Bruckner's Managed Service Plans, those concerns are replaced with trained technicians, genuine OEM parts, state-of-the-art facilities, connected services, and a dedicated fleet management partner. The result? *Total peace of mind knowing your trucks are always road-ready.*

Let Bruckner's safeguard your investment so you can focus on running your business.

ANTHEM®

PRECISION ENGINEERING
MEETS REGIONAL DEMANDS

The Mack Anthem® is a local workhorse, a revolution in safety, performance, fuel-efficiency, and sometimes, a home away from home. But most of all, it's what gets the job done. The future of regional haul isn't just about going faster — it's about moving smarter through routes where performance determines profits. The Mack Anthem® tackles this challenge with cutting-edge aerodynamics and a fuel-efficient powertrain that doesn't sacrifice power.
