MACK®

BUILT FOR WHAT'S NEXT.

PICTURES PROVIDED BY MACK TRUCKS

MACK UNVEILS THE KEYSTONE® AND ALL-NEW GRANITE® AT CONEXPO 2026

At ConExpo-Con/Agg 2026 in Las Vegas, Mack Trucks didn't just introduce new models—they made a statement about the future of vocational trucking. With the world debut of the all-new Mack® Keystone® and the fully reimagined Mack® Granite®, Mack is redefining what customers can expect from trucks built for the toughest jobs. For Bruckner's Truck & Equipment customers across construction, agriculture, energy and heavy-haul industries, these two platforms represent a powerful step forward—combining durability, cutting-edge technology and driver-focused innovation in ways that directly impact productivity and uptime.

A NEW CATEGORY OF CAPABILITY: THE MACK® KEYSTONE®

The all-new Mack Keystone marks a major milestone as a purpose-built Class 8 vocational tractor designed to perform seamlessly across both rugged off-road environments and highway applications.

Built on Mack's unified platform—sharing advanced technologies with the Pioneer™, Anthem® and new Granite®—the Keystone delivers a unique combination of versatility and refinement.

Vocational tractors routinely face rutted dirt roads, rocky terrain, and unpredictable jobsite conditions. The Keystone® is built with higher ground clearance and rugged off-road capability to help operators tackle these obstacles and prevent damage across demanding work environments.

THE KEYSTONE BRINGS HIGHWAY-LEVEL COMFORT INTO VOCATIONAL APPLICATIONS

DESIGNED FOR THE TOUGHEST TERRAIN

From logging roads, to construction sites and rural agricultural routes, the Keystone thrives where conditions are unpredictable. Higher ground clearance, optimized approach angles and the available Mack MaxRide™ suspension system provide exceptional ride quality and control across uneven terrain.

Whether hauling equipment into remote job sites or transitioning back onto the highway, the Keystone is engineered to handle it all without compromise.

POWER MEETS EFFICIENCY

At its core, the Keystone is powered by the Mack MP®13 engine, delivering up to 540 horsepower and 1,950 lb-ft of

torque. Paired with the mDRIVE™ HD automated manual transmission, it provides smooth, efficient performance—while improving fuel efficiency by up to 6% compared to its predecessor. That means more power where it counts—and lower operating costs over time.

BUILT AROUND THE DRIVER

Inside the cab, the Keystone brings highway-level comfort into vocational applications. A driver-centric layout features wrap-around controls, improved visibility and ergonomic enhancements like a flat-bottom steering wheel and integrated device management systems. With options including day cab and sleeper configurations, the Keystone ensures operators can stay comfortable and productive—no matter how demanding the job.

RAISING THE BAR: THE ALL-NEW MACK® GRANITE®

While the Keystone introduces a new category, the all-new Mack Granite represents a complete reinvention of one of the most trusted names in vocational trucking. From the ground up, the Granite has been redesigned to deliver more capability, more safety and more comfort than ever before.

INDUSTRY-FIRST SAFETY INNOVATION

The new Granite sets a benchmark for safety in vocational trucks, introducing several industry-first technologies. The available Mack Protect™ safety suite includes 270-degree radar coverage—with both driver-side and passenger-side radar systems—alongside front camera and radar integration.

Built stronger so you dominate the jobsite longer. The all-new Mack® Granite® delivers uncompromising durability that you've trusted for decades, now paired with the premium comfort that helps you maximize your time behind the wheel.

PERFORMANCE THAT WORKS AS HARD AS YOU DO

Like the Keystone, the Granite is powered by the Mack MP[®]13 engine, delivering up to 540 horsepower and enhanced fuel efficiency. The updated mDRIVE[™] transmission improves shift speed by up to 30%, offering better responsiveness and control—especially under heavy loads or steep conditions.

For specialized applications, additional engine and transmission options provide flexibility to match any job requirement.

A COMPLETELY NEW CAB EXPERIENCE

The Granite's all-new cab is wider, stronger and more driver-focused than ever. With nine additional inches of width and a redesigned interior based on real driver feedback, it offers increased space, improved ergonomics and enhanced visibility.

PREMIUM FEATURES INCLUDE:

Adjustable steering column and column-mounted shifter
Advanced seating with lumbar, heating and ventilation options

Digital instrument cluster and integrated connectivity
Every detail is engineered to reduce fatigue and improve productivity on long, demanding workdays.

ONE PLATFORM, ONE PURPOSE: CUSTOMER SUCCESS

What ties the Keystone and Granite together is Mack's unified approach to design and engineering. Both models share core technologies, safety systems and connectivity tools—making it easier for fleets to standardize operations while maximizing uptime.

With Mack Connect telematics, over-the-air updates and proactive diagnostics, these trucks are designed to stay on the road and ahead of potential issues.

And with flexible configurations—from axle-forward to axle-back setups, multiple cab options and customizable upfits—customers can tailor each truck to their exact needs.

COMING SOON TO BRUCKNER'S CUSTOMERS

The Mack Keystone is expected to be available for order in late Q3 2026, while the all-new Granite will begin production in early 2027.

For Bruckner's Truck & Equipment customers, these launches represent more than new models—they signal a new era of vocational performance.

THE BOTTOM LINE

Mack has always built trucks known for durability. With the Keystone and the all-new Granite, they've elevated that legacy—bringing together rugged capability, advanced safety and driver-first design in ways that directly impact real-world performance.

For customers who demand more from their equipment—and expect it to deliver day in and day out—these trucks aren't just upgrades. **They're game changers.**

ADDITIONAL BREAKTHROUGH FEATURES

Electronic Park Brake
with rollaway protection

E911 auto-call for
emergency response

Optional multi-camera
visibility systems

These features are designed
specifically for the high-risk
environments vocational drivers
face every day.
